Teacher Guide

NumberSense: Manipulating Numbers

Workbook 1

This guide contains suggested activities linked to each page in the corresponding NumberSense Workbook.

Due to the developmental stage of children completing Workbook 1, questions are limited to:

- Number identification
- The concept of more or less
- Order of numbers (What comes before/after a certain number or between etc.)

Teachers should have the number line for the children to use as a reference. As the children gain more confidence, the teacher may want to omit the visual cue of the number line and have the children answer the questions mentally.

Initially, children may use the beans in order to visualise the question. The goal, however, is for the children to answer the questions in this guide mentally.

The number range of the questions in this guide are generally higher than the questions on the corresponding page. Teachers should be sensitive to the level of the children in their focus group and should adjust the questions asked to a suitable number range.

The children's ability to reflect on their own thinking is critical during the learning process. This is a skill that needs to be fostered by the teacher. As the children gain confidence in their own ability, teachers should encourage them to verbalise their understanding and explain their thinking.

Using this Guide

Below is an excerpt from the guide. The blue column contains the information/questions the teacher would ask during the manipulating numbers routine. The answers to the questions can be found in the green column. If a child gives the incorrect response, teachers must use the opportunity to clarify their understanding.

		What the teacher would say						What the child would say	
Question Number	Description of activities For Teacher's Reference only					Verbal question to be asked by the teacher		Child's response (If incorrect, teacher must use the opportunity to clarify the child's understanding)	
	Single Digit Arithmetic	Arithmetic with Multiples of 10	Completing the 10s	Bridging the 10s	Doubling & Halving	Multiplication Facts	NumberSense Book 1: Page 1		
1							I want you to look at the number line. Show me the number 2.		2
2							Which number comes after 2?	<input type="checkbox"/>	3
3							Which number comes before 2?	<input type="checkbox"/>	1

Please refer to the NumberSense Workbook Series Teacher Guide on Counting, Manipulating Numbers and Solving Problems pages 23-41 for a detailed description of the manipulating numbers activities.
